

TikTok Shop Content Creation Services

Video content, creators and TikTok Shop campaigns for ecommerce brands selling into Ireland and Europe

800+

vetted creators

3 min

to first creator match

16

brand partners

Who we are

CreatrHub is an AI-native marketplace that connects brands with vetted creators for short-form and long-form video campaigns. We launched in March 2026 and have grown to more than 800 vetted creators, entirely through organic growth. We are registered in Ireland and hold TikTok Shop TAP, CAP and TSP approvals, so we can support brands on TikTok Shop directly rather than through a third party.

What is UGC?

UGC stands for user generated content: video and photo content made by real people rather than by a brand's own marketing team. It looks and feels like a recommendation from a genuine customer, which is why audiences tend to trust it more than polished studio adverts.

Brands commission UGC from creators to use on their own channels, in paid ads, on product pages and on TikTok Shop. It is usually faster and more affordable to produce than a traditional shoot, and it gives brands a steady supply of fresh content to test and improve.

What we offer

1. UGC content creation

Authentic, creator made video that looks native to the feed and is built to convert. Brands brief us on the product and goal, and we match them with creators who fit.

- **Short form and long form video:** product demos, unboxings, reviews, tutorials and lifestyle content.
- **Matching on behaviour, not stereotypes:** our AI matches creators using behavioural signals rather than demographic proxies, and your first match can take about three minutes.
- **Clear paperwork:** contracts are generated automatically, so usage rights and deliverables are agreed up front.
- **Content review studio:** you review and approve content in one place before anything goes live.
- **Milestone escrow:** payment is held safely and released to the creator when you approve the content, which protects both sides.

2. TikTok Shop content and affiliate campaigns

For brands selling, or preparing to sell, on TikTok Shop, we run the creator side of the channel.

- **Creator roster:** access to creators experienced in TikTok Shop content.

- **Affiliate programmes:** set up and manage creator commission structures for your products.
- **TikTok LIVE:** hosted shopping sessions with creators, offered on an hourly-rate basis.
- **Shop partner collaborations:** we already take part in live TikTok Shop partner collaborations with sellers.

How it works

1. **Brief:** Tell us about your product, audience, goals and the kind of content you want.
2. **Match:** We shortlist vetted creators who suit your brand.
3. **Agree:** Deliverables, timelines and usage rights are set out in an auto generated contract.
4. **Create:** Creators produce and submit content.
5. **Review:** You review, request changes and approve in the content review studio.
6. **Pay and launch:** Escrow releases on approval, and the content goes live on your channels or TikTok Shop.

New to TikTok Shop?

Many of the brands we work with are Irish, founders run businesses with a physical product who sell mainly through Shopify and Instagram and haven't started on TikTok Shop yet. If that's you, here's what the first month looks like.

Your first month

- **Week 1 – Set up:** we confirm your product fit, set up your TikTok Shop presence (or connect an existing one), and agree the content and campaign plan.
- **Week 2 – First content:** creators are matched and briefed, and your first UGC videos are produced and go through the content review studio for your approval.
- **Week 3 – Launch:** approved content goes live, and we set up an affiliate structure so creators can drive sales directly through TikTok Shop.
- **Week 4 – Review:** we look at what performed, agree on next steps, and scale up the content and creators that are working.

What you'll need to provide

- Product samples for creators, and basic brand guidelines (tone, do's and don'ts).

- A TikTok Shop seller account, or authorisation for us to help set one up.
- Someone on your side to review and approve content within the agreed turnaround.

Starting price

Plans for brands new to TikTok Shop start from €[3,000] per month, covering shop set up, platform access and creator management. TikTok Shop LIVE work is priced separately, on a fixed rate plus commission, agreed with you upfront.

Who it's for

Direct to consumer and ecommerce brands, founders and boutique agencies who want a steady supply of creator content without managing dozens of freelancers by hand. It suits brands that are launching on TikTok Shop, or that already sell online and want to build more trust and reach through creators.

Selling into Europe

TikTok Shop Ireland is part of the EU market. Combined with local prep and fulfilment through Dockentra in Limerick, brands can run content, TikTok Shop and delivery from one connected setup. UK brands in particular can register through Ireland to reach EU customers.

Pricing

Pricing is based on a fixed rate 3,000 euro plus commission and is subject to negotiation.

Get started

To talk through your product and what content would suit it, get in touch with us directly and mention that you were introduced by Dockentra.
